TESLA MODEL 3

The Palo Alto midsize sedan stands out for its performance and range of nearly 600 km. When you think of an electric car, the first brand to come to mind is definitely Tesla. The American house, created by Elon Musk, has believed in this type of car since its debut and in 2017 unveiled the Tesla Model 3, a four-door sedan with an intriguing design. A little over a year after its arrival on Italian roads, this powerful electric continues to be one of the flagships of the Californian brand.
